Jl.Setia no 17

Muhammad Kahfi Bachtiar has experience in Software Engineering. Skilled in designing user interfaces (Front-End) and developing efficient and secure software. Participated in the Mini Software Engineering Bootcamp by RevoU to deepen his understanding of software development. Actively explores the latest technologies and has a strong interest in Software Engineering and Network Security. Proactively follows industry developments and continuously enhances his skills through various related courses.

Experiences

RevoU - Jakarta, Indonesia

Mar 2025

Student

Worked on mini projects as part of the curriculum, allowing the application of learned concepts. For example, one participant developed a simple website using HTML for structure, CSS for styling, and JavaScript for interactivity and functionality.

Lapangin - Bandung, Indonesia

Oct 2024 - Jan 2025

Front End Developer

As part of a major team project, we developed Lapangin, a web platform that connects users with various sports facilities, coaches, and fitness classes in their city. Our goal was to simplify the process of booking sports venues and hiring professional trainers for personal training sessions.

BeasiswaKita - Bandung, Indonesia

Oct 2024 - Jan 2025

Front End Developer

BeasiswaKita is a scholarship program designed to support Indonesian students in achieving higher education. This program offers financial assistance and mentorship for junior high school, senior high school/vocational/Islamic school students, as well as diploma (D3) to master's (S2) students across Indonesia.

Education

Universitas Telkom g - Bandung, Jawa Barat
